Education

MSc Data Science, Tilburg University

- Graduated cum laude after finalizing my thesis on soybean yield prediction. Participated in Machine Learning, Computational Statistics, Bayesian Multilevel Models, and Deep Learning courses. Committed to acquiring advanced skills and a comprehensive understanding of data analytics and its statistical foundations.

Master in Finance, CFA Track, Tilburg University

- Graduated from the CFA track with distinction. Gained knowledge in derivative securities, empirical finance, financial modeling, financial markets, and corporate finance.
- Thesis: Investor macroeconomic risk perception and cross-sectional returns: an analysis of the US stock market using PVS Metric.

Bachelor in Business Management, Rotterdam Business School

- Completed my undergraduate studies with a focus on practical project experience, improving my soft skills, and participating in international collaborations. This program provided me with a comprehensive understanding of business management in a global context.

Experience

Operations Specialist

Flow traders

📅 September 2024- Current 📍 Amsterdam, Netherlands

At Flow Traders, I coordinate and optimize the post-trade cycle on the crypto trading desk. My responsibilities include trade settlements, maintaining client relationships, and overseeing the trading infrastructure. I also lead automation initiatives, developing and deploying bots that streamline inventory management and transaction tracking. This fast-paced environment, with its focus on data quality and low latency, has strengthened my data engineering expertise and exposed me to platforms such as Kafka and Airflow.

Intern at Data Office within Finance department

Allianz Benelux

📅 May 2024- August 2024 📍 Rotterdam Netherlands

During my internship in the Data Office within the Finance department at Allianz Benelux, I contributed to two main projects: developing predictive models by analyzing and leveraging previously unexplored datasets, and conducting research and development to identify innovative technical solutions for the cost management framework. By collaborating with stakeholders across the organization, I provided actionable insights to support strategic decision-making and advance the company's financial objectives.

Intern at Global Process & Control Improvement (P&CI)

The Heineken Company

📅 February 2021- August 2021 📍 Amsterdam Netherlands

The role was linked to the Issues and Task Management Process, part of Heineken's Risk Management Process. As an intern, I revamped dashboard reports for HeiRules and ICFR, maintained materials on SharePoint and PowerBI, and supported various compliance processes. My key responsibility was identifying global operational improvement opportunities, guided by Lean Six Sigma principles.

Certifications & Projects

- 🌟 **Microsoft Azure Fundamentals**
By Microsoft on Coursera
- 🌟 **ETL and Data Pipelines with Shell, Airflow and Kafka**
By IBM on Coursera
- 🌟 **Practical Guide to Trading Specialization**
By Interactive Brokers on Coursera
- 🌟 **Streaming Weather ETL Pipeline with Kafka and Airflow to Telegram**
github.com/erionmediu/Weather-streamer
- 🌟 **Detecting and diagnosing various lung and colon cancers using computer vision techniques.**
github.com/erionmediu/Deep-Learning-report
- 🌟 **The birthday paradox**
